Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-10, and 21--24, drawn to testing ionic conductive liquids, classified in Class 134, subclass 22.14.

Group II: Claim 11, drawn to method of automatically cleaning a milk line with alkali cleaning fluid, classified in Class 134, subclass 22.13.

Group III: Claim 12-15, drawn to method of cleaning and rinsing rinsing fluid by circulating cleaning fluid, classified in Class 134, subclass 10.

Group IV: Claim 16-20, drawn to method of cleaning elements of teats by robotic mechanism, classified in Class 134, subclass 18.

The inventions are distinct, each from the other because of the following reasons: Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I, claims 1-10 and 21-24, Group II, claim 11, Group III, claims 12-15, and group IV 16-20 are unrelated since each invention has different effect and different mode of operation. Group I require to test two different distinctive ionic conductivity liquids in hydrogen peroxide which is not required in II-IV invention, .Group II requires an automatic cleaning by adding alkali cleaning fluid wick is not required by inventions II-III and IV, Group III requires cleaning and rinsing by circulating cleaning fluid by circulating which is not required by inventions I, II and IV, and Group IV requires a method of cleaning elements of teats by robotic mechanism, which is not required by inventions I, II and III.

Art Unit: 1746

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Penrose Lucas Albright on April 29, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saeed T. Chaudhry whose telephone number is (703) 308-3319. The examiner can normally be reached on Monday-Friday from 9:30 A.M. to 5:00 P.M.
